Reception Homework – Friday 13th March 2026

Once your homework is completed, take a photo and upload it onto Tapestry. Please give it the title: Homework 13.03.2026

Activity:

In school, we have been learning about the different ways to make 7. Can you help Numberblock 7 with their washing? They need help to work out the different ways they have made 7 on their washing lines. Count how many items are on the top line and write that in the first box. Then count how many are on the bottom line and write that in the second box. How many are there altogether? Some of the boxes have been completed already to help you. Can you check that they got it right?

If you do not have a printer at home, do not worry! You could look at the pictures on a screen and either draw them yourself in the homework book or you could just write the number sentences in the homework book instead.
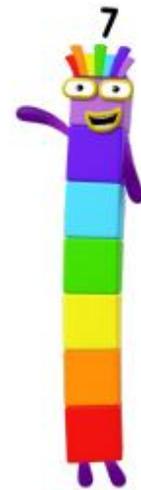

Parents:

- Talk to your child about what they have learnt this week.
- See the worksheet below for the activity.
- Support them with carefully counting the items on the washing line to work out which two numbers when added together make 7.
- Support your child with writing the numerals correctly (see sheet on website).

Number 7 Washing Line Number Bonds

I need help with my washing! Help me work out the different ways I have made 7 on my washing lines.

7

$4 + \boxed{} = 7$

$\boxed{} + 2 = 7$

$\boxed{} + \boxed{} = 7$
