

The Very Hungry Caterpillar

Day 1

English - Read the story of The Very Hungry Caterpillar (or watch it [here](#)). Start to keep a food diary of some of what you eat each day. Draw pictures and label them. Keep this going all week

Maths - Caterpillar counting - Draw caterpillars with a given number of body segments, or count how many body segments on a caterpillar that an adult has drawn

Day 2

English - Read the story of The Very Hungry Caterpillar (or watch it [here](#)). Practise writing the days of the week and next to each day draw or write what the caterpillar ate.

Maths - repeating patterns - use coloured paper, felt tips, buttons or anything else you can find to create a caterpillar with a repeating pattern on his body. Try a two colour repeating pattern. Can you make one with three colours or even more? How long can you make your caterpillar?

Day 3

English - Following instructions. Follow instructions to make a simple recipe. We like this [frozen yogurt bark](#) or these [Crispy Chocolate Cakes](#), but find something easy with the ingredients you have in your cupboards. An adult will probably need to read the instructions but see if you can follow them on your own

Maths - Can you put the numbers in the right order on this [Counting Caterpillars](#) game?

Day 4

English - Picture sequencing. Talk about [these pictures](#) and put them in the order they happen in the story

Maths - Collect together some different food that the Caterpillar might have eaten. Make addition sums with them - e.g. how many piece of fruit will he have eaten if he eats the strawberries and the apples?

Day 5

English - Add some extra information to your food diary today, writing a sentence each day about what you have done. Draw a picture to go with it too.

Maths - Go for a walk around your local area. What numbers can you spot? Tell an adult what one more or one less is of each number you find. What is the highest number you can find?

To Do List

Make a [Caterpillar Paper Chain](#) - how long can you make it?

Make a caterpillar collage out of recycled materials - bottle tops, sweet wrappers, etc.

Go on a nature walk. Look at the different trees and leaves. Where might the Hungry Caterpillar live?

Kim's game - place a few items on the table and look carefully at what's there. Remove one item and see if the other person can guess what it is. Take turns

Read a book together every day from [Bug Club](#)

Complete at least one [10 Minute Shake Up](#) every morning and every afternoon

Complete at least two phonics games every day on [Phonics Play](#) (username: march20, password: home). Ask your teacher which phase you should choose on each game

Have some fun and learn about numbers with the [Numberblocks](#) each day
