

### Homework 30.01.2026

This week in maths the children have been learning about the use of the + and = symbols in equations. We know that when we add the parts can be written in any order, for example;  $2 + 4 = 6$  and  $4 + 2 = 6$ .

We used part-whole model templates to support their understanding. Part + (plus) part = (equal to) the whole.

For homework we would like you to partition 7 in different ways. Record these as 4 equations. See example below.

$$\boxed{1} + \boxed{6} = \boxed{7}$$

$$\boxed{6} + \boxed{1} = \boxed{7}$$

$$\boxed{7} = \boxed{1} + \boxed{6}$$

$$\boxed{7} = \boxed{6} + \boxed{1}$$

$$\boxed{\phantom{0}} + \boxed{\phantom{0}} = \boxed{\phantom{0}}$$

$$\boxed{\phantom{0}} + \boxed{\phantom{0}} = \boxed{\phantom{0}}$$

$$\boxed{\phantom{0}} = \boxed{\phantom{0}} + \boxed{\phantom{0}}$$

$$\boxed{\phantom{0}} = \boxed{\phantom{0}} + \boxed{\phantom{0}}$$

$$\square + \square = \square$$

$$\square + \square = \square$$

$$\square = \square + \square$$

$$\square = \square + \square$$

$$\square + \square = \square$$

$$\square + \square = \square$$

$$\square = \square + \square$$

$$\square = \square + \square$$
