

Maths homework – Friday 6th December 2024

Last week we were finding missing numbers. We have been thinking about the part, part whole model to help us work out how to find the missing number.

For example:

$$\underline{\hspace{2cm}} + 31 = 74$$

31 is one of my parts and 74 is my whole. To find my missing number I will do $74 - 31$.

$$\underline{\hspace{2cm}} - 22 = 73$$

22 and 73 are both parts. We need to find the whole. We will need to do $22+73$.

1. $70 - \underline{\hspace{2cm}} = 18$

6. $61 - \underline{\hspace{2cm}} = 19$

2. $\underline{\hspace{2cm}} - 37 = 25$

7. $\underline{\hspace{2cm}} - 17 = 51$

3. $\underline{\hspace{2cm}} - 16 = 25$

8. $35 - \underline{\hspace{2cm}} = 18$

4. $87 - \underline{\hspace{2cm}} = 61$

9. $39 - \underline{\hspace{2cm}} = 18$

5. $\underline{\hspace{2cm}} - 22 = 73$

10. $\underline{\hspace{2cm}} - 29 = 38$

You can use column method to find your answers. Write this in your book.

Play the addition and subtraction levels on this game:
